

PRASHANTH ABBU

SENIOR FRONTEND DEVELOPER | ANGULAR & REACT | 5+ YEARS EXPERIENCE

CONTACT NO ☎: +919493223214

Mail ✉: abbu.prashanth@gmail.com

PROFESSIONAL SUMMARY

Frontend Developer with 5+ years of experience building scalable, high-performance enterprise web applications using **Angular, TypeScript, RxJS**, and modern frontend technologies.

Experienced in developing reactive forms, REST API integrations, state management, and reusable components.

Currently expanding expertise in **React.js** through hands-on learning and personal projects while delivering enterprise applications in Agile environments.

SKILL PROFILE

Frontend Frameworks	Angular (11–19), Angular Material, Prime Ng, Micro Frontend, React JS (Basics)
Languages	TypeScript, JavaScript (ES6+), HTML5, CSS3
State Management	RxJS, Observables, Subjects, BehaviorSubject, NGRX Basics, Redux Toolkit (Basics)
Forms	Angular Reactive Forms, Dynamic & Nested Forms
API Integration	RESTful APIs, HttpClient, Interceptors, Axios (Basics)
UI & Styling	Bootstrap, Flexbox, Responsive Design
Tools & DevOps	Git, Azure DevOps, JIRA, Postman
Build & Package	Angular CLI, NPM, Webpack

IT EXPERIENCE

Organization	Position Held	Duration
Value momentum Pvt Ltd	Senior Software Engineer	Nov 6 th , 2023, to Till
CES Technologies Pvt Ltd	Software Technologist	Aug 25 th , 2021, to July 28 th 2023
Accenture	Software Developer	Dec 28 th , 2020, to Aug 15 2021

ROLES & RESPONSIBILITIES

- ✓ Implemented Angular route guards and resolvers to secure application routes and preload critical data.
- ✓ Optimized application performance using lazy loading, shared modules, and reusable components.
- ✓ Developed reusable UI components using Angular Material to ensure consistency across the application.
- ✓ Integrated RESTful APIs using Angular HttpClient and interceptors for authentication, authorization, and centralized error handling.
- ✓ Implemented reactive state management using RxJS, Subjects, and BehaviorSubjects to manage asynchronous data flows and application state.
- ✓ Collaborated closely with backend developers, QA teams, and business stakeholders to deliver high-quality software solution

PROJECTS HANDLED

PROJECT 1 - LV Prasad Eye Institute

Role: Design and Development
Technologies: Angular 16, Typescript, HTML, CSS, Angular CLI and Angular Material

Description:

Developed a comprehensive web application for LV Prasad Eye Institute to streamline patient registration, appointment scheduling, and clinical data management. Key functionalities included integrating dynamic error messaging, implementing patient registration with conditional validations, enabling multi-tier dropdowns and autocomplete features, and managing patient billing with category-based tariff filters. Collaborated closely with backend teams to ensure API integration for IVR systems and image management, optimizing overall patient and clinical workflows.

Key Responsibilities:

- ✓ Worked closely with clients and backend teams to translate business requirements into scalable Angular modules, delivering features in iterative Agile sprints.
- ✓ Implemented complex reactive forms and RxJS-based data flows to handle dynamic UI interactions.

PROJECT 2 - Helena Agri Hub

Role: Design and Development
Technologies: Angular 11+, Typescript, HTML, CSS, Angular CLI, RxJS and Angular Material, Flexbox, Git

Description:

The Helena Agri Hub project is a transformative agricultural platform designed to revolutionize the way farmers procure seeds. Recognizing the vital role of seeds in crop production, the project aims to empower farmers by providing them with a user-friendly digital solution to streamline the seed purchasing process.

Key Responsibilities:

- ✓ Worked closely with clients and backend teams to translate business requirements into scalable Angular modules, delivering features in iterative Agile sprints.

PROJECT 3 - Employee Management Portal

Role: Personal Project
Technologies: React.js, TypeScript, React Router, Axios, Material UI

Description:

Developed a web application to manage employee information, departments, and attendance details.

Key Responsibilities:

- ✓ Built reusable React components to create a scalable and maintainable application structure.
- ✓ Implemented React Hooks.
- ✓ Integrated REST APIs using Axios.
- ✓ Implemented routing using React Router.
- ✓ Used Context API for state management.

EDUCATION SUMMARY

- ✓ **B Tech** (2014-2018) from JNTU with **70%** aggregate.
